STATEMENT

Pierre René Sp. z o.o., the manufacturer of the Miyo brand, declares that the greasy stains that appear in the MIYO Beauty V Tricks Insta Glam Enriched palette with glitter shadows do not affect the quality of the product and are safe to use. Glitter shadows are characterized by a specific formula with a high content of emollients and film-forming substances in which particles are embedded. The cardboard palette in contact with such a mass causes the absorption of greasy emollients and film-forming substances, which is manifested by visible greasy stains.
